

Ometepe Island...Nicaragua

by Dave Colwell

 Puesta del sol
Fam. Sandra Barrera
Calle 100 No. 1000
Isla de Ometepe

For rent
Kajak
Paddle boats

Did you Know?

Blue Morpho butterfly adults spend most of their time motionless on the forest floor, in low growing shrubs, and in the understory trees with their wing folded. However, when they are searching for mates, Blue Morphos fly throughout all of the different layers of the tropical rainforest.

At times they can even be seen flying above the crowns of the canopy trees.
